Can I make notes private?

FAQ · https://behca.com/support/can-i-make-notes-private/

Yes you can! To the right of each General Note you will see a  icon. By clicking this icon it will change to  signifying that the note is now private.

If you have a note that you don't want your shared users to see, just click that icon. Once a note is marked as private, only you will be able to see these notes on the **Track** and **Analyze** pages.
