How do I change the customized tracking options?

FAQ · https://behca.com/support/how-do-i-change-the-customized-tracking-options/

All data points in the drop-down menus can be customized on the ***Profile > Customized Tracking*** panel. From this page you can add new data points, delete options that do not apply, or drag and drop them into the order you would like them to display. Note: drag and drop is currently available for desktop browsers and will not work on mobile devices.
