How do I customize the data tracking points on the mobile app?

Mobile App · https://behca.com/support/how-do-i-customize-the-data-tracking-points-on-the-mobile-app/

The mobile app was built with simplicity and quick data entry in mind, so in order to add new profiles or customize data tracking points on your profile you can log into the web app (login link above), preferably with a tablet or desktop browser, with the same username and password you use on the mobile app. There you can find many options for customizing your profile or inviting other collaborators.
